- Git/GitHub
- Docker
- CI/CD
- PostgreSQL
- Expo/EAS
- Makefile
- Shell

Concepts:

- Parsing | Sockets
- Memory management
- Multithreading

EDUCATION

École 42 - Rome

Core Curriculum (2024)

Bac Pro Mechanic

Perpignan (2013)

ABDALLAH KHEFIF

C/C++ DEVELOPER

Developer who completed the full curriculum of École 42 in Rome, an intensive English-taught program focused on systems programming and backend development. Specialized in C/C++, systems programming, and backend development. Currently looking for an internship or a first permanent / work-study position. Immediately available. Open to relocation.

PROJECTS

MiniShell - C Team project

- Full Unix command-line interpreter (bash/zsh-like).
- Pipe handling, redirections (<, >, >>), and environment variables.
- Complex parsing with quote and escape character management.
- Signal handling (Ctrl+C, Ctrl+D, Ctrl+\).
- Builtins (cd, echo, pwd, export, unset, env, exit).

WebServer - C++ Team project

- RFC 7230-7231 compliant HTTP/1.1 server.
- Full HTTP request parsing (GET/POST/DELETE).
- Concurrent connection handling with epoll/kqueue.
- CGI support, file upload, and HTTP error management.
- Git collaboration: branches, merge, code reviews.

Philosophers - C Solo project

- Dining philosophers problem simulation (threading).
- Advanced mutex and synchronization management.
- Deadlock and race condition prevention.
- Performance optimization.

EXPERIENCE

Ecole 42 Rome

November 2024 - Present

- Intensive 1200+ hour curriculum in C/C++ and Unix systems programming.
- Training focused on systems programming and backend development.
- Peer-to-peer pedagogy and self-directed learning through hands-on projects.
- Collaborative work methodology: Version control with Git and GitHub, Peer code reviews, Advanced debugging (gdb, valgrind), Strict coding standards compliance, and Team-based complex project development.
